PREFACE.

In presenting the present Catalogue to the public, the Proprietors do not consider it necessary to say more to their old friends and patrons than that, in future, their business will be conducted in a manner worthy of the long-established reputation of the Linnæan Botanic Nurseries, and that no exertions will be spared to make every transaction satisfactory, in all respects, to those with whom they may have dealings.

Those unacquainted with this Establishment, we would refer to the fact that these Nurseries were *established in* 1732, and have continued uninterruptedly in the same village, and in the possession of the same family, since that time—a period of *One Hundred and Thirty one years*—longer, we believe, than any other business establishment, of any nature whatever, in this country, has existed under the same name; that from this Establishment nearly all the great European Nurseries have obtained their collections of American Trees and Plants, and that it has, at different times, supplied the Royal and Imperial Horticultural Establishments of Great Britain, Russia, Austria, Prussia, Egypt, Mexico, and numerous less important States.

We believe that no establishment which does not combine enterprise and energy with perfect accuracy, could so long and successfully have retained its reputation and the confidence of the public.

In arranging the present Catalogue, we have thought it unnecessary to add descriptions to the varieties of fruits, (with the exception of a few of the newer and less-known kinds,) as such information is now easily accessible to all at very small expense, either in Horticultural Periodicals, the Reports of Pomological Societies, or in Downing's Fruit Book, and other kindred works.

We would refer also to the large Descriptive Catalogues which have been gratuitously disseminated from this Establishment, through all sections of the Union, at large expense for a long series of years.

We need scarcely state that our Catalogues are not made up from books only, but that we possess every article comprised in them. Much pains is taken in procuring new varieties, as soon as they are proved worthy of cultivation, at the same time that care is exercised not to offer to our customers varieties only known for their novelty before their qualities shall have been fully tested.

Within a comparatively short time, a large addition has been made to the amount of land under cultivation in our Nurseries, by the purchase of an extensive plot of excellent farm land, very favorably situated; the trees grown on which are now offered for sale.

The natural strength and fertility of the soil of this locality is such, that it ensures a most healthy and vigorous growth to the trees, which seem to become hardened and confirmed as they progress, and is devoid of that rank, stimulated, and unnatural exuberance which trees so generally exhibit when reared on lands that have never been subjected to previous culture. The Trees thus cultivated, after making at first a rapid development, are so sensitive to cold, that the winter easily affects them, and they gradually pine away till they become feeble and unproductive.

The climate of *Long Island* being subject at all times to the boisterous winds of the Ocean and the Sound, seems to be particularly favorable to perfecting the hardihood of Trees. The vaccillation of alternate cold and mild periods during the winter, accompanied by the frequent freezings and thawings to which trees are here subject throughout all stages, prepares them for the endurance of the utmost degree of cold and rigor incident to the most northern latitude; it being found that trees, like men, become much more hardened in a changeable climate than in one regularly cold where the constitution is not subjected to trials.

It is doubtless from this cause that the Long Island trees, with which New England has been generally supplied, and also those which have been sent to the coolest regions of the West, have been found to better withstand the severest winters, than those which have been obtained from other lacalities. Indeed it can be readily realized that trees so robust and hardy, and yet so vigorous, must possess a great superiority over those grown in localities where the mercury sinks each year to 10° and 20° below zero during a very prolonged winter, thus retaining the trees in a frozen, torpid and death-like state for many months, freezing and bursting the inner vessels, affecting the sap, and weakening them to such a degree that they can never regain their original health and strength. Some lessons may be derived from the fatal experience of recent winters at the West, to which may be superadded the inconsiderate use by many nurseries of unsuitable stocks for budding and grafting, and especially of the comparatively tender Mazzard stock for Cherries, instead of the hardy Mahaleb, the latter being much better suited to the North and West.

All the Trees which we offer are in the most healthy and vigorous state, and will be supplied at the rates named in the present Catalogue; and it may be taken as a rule that we will

SELECT FIGS—FIGUIERS.

The culture of this delicious fruit has recently become an object of particular attention, and the Trees require no more care or protection in winter than the delicate kinds of Grapes, and can be grown at Baltimore, and south of it, in any quantities for market; and we may soon expect the markets of New-York, and other Northern cities, to be supplied from the more Southern localities. The Trees are exceedingly productive, and produce two regular crops in a season. We have rejected a number of varieties, such as Cyprès, Col Rentine, &c., which have been found the least worthy of culture.

Those marked *, 35 cents. Those not marked are 75 cents. When a dozen are taken of 6 varieties, 2 each, the price will be $4 50.

RASPBERRIES—FRAMBOISIERS.

All the varieties are red except those designated otherwise; and all mature their fruit in July except the Twice Bearing kinds, and they produce a second crop in September or October. In order to have an ample crop of autumnal fruit, it is necessary to prune off the old shoots entirely in February or beginning of March, as the autumnal fruit is produced entirely on the shoots of the same year. There are no Monthly Raspberries; but only Twice Bearing ones. The leading varieties can be supplied by the thousand at reduced rates. N. B.—Any number less than a dozen will be charged higher. A single plant being charged at one-eighth of the price per doz.

GOOSEBERRIES—GROSEILLERS EPINEUX.

☞ The first four varieties named below are all of American origin, and are *not subject to mildew;* they do not, however, compare with the English varieties in size, although, from their wonderful productiveness, they produce greater crops.

In consequence of the almost universal difficulty from mildew experienced with the English Gooseberries, we have discontinued the culture of a great many varieties, and can only supply them in limited quantities.

SCIONS FOR ENGRAFTING AND CUTTINGS.

Scions of all kinds of Fruit Trees, suitable for grafting, will be supplied when 40 or more kinds are ordered, more or less of each, as convenient to us, at 25 cents per parcel, or at 50 cents per dozen grafts of each variety where the price of a tree does not exceed that sum (50 cents); but where it does, the same price will be charged for the dozen scions, or for a parcel where the kind is very rare, as for a tree of the same kind. When a large number of scions are wanted, of the leading varieties, they will be supplied at $1 50 per 100; or at the following rates per 1000, all correctly *labelled*: Apples, $5, Pears, $6, Cherries, $6, Plums, $10.

Scions of Anger's Quince, for budding Pears on, $1 50 per 100, and $10 per 1000, and Scions of the plentiful kinds of Currants, Gooseberries, Raspberries, Berberries, Mulberries, Poplars, Willows, Altheas, Roses, and all other Trees and Shrubs that will grow from cuttings, $2 50 per 100 and $20 per 1000, and Figs and Pomegranates $5 to $8 per 100; but no quantity is sent amounting to less than the price of a Tree or Shrub of the same kind. Scions of the eight finest species of Osiers, most celebrated for baskets, &c., $1 per 100 and $2 to $5 per 1000. It is better that such orders be sent in the fall or winter; and the scions can be forwarded by express if so ordered.

Scions of Grapes, of a number of the finest kinds, can be supplied if applied for in season, at from $4 to $8 per 100, or in less quantities; but in no case will scions of any variety be sent to a less amount than the price of a vine; and of the very rare varieties three eyes, and of others, six eyes of any one variety will be considered equivalent in value to a vine. Scions of Isabella, Catawba, Clinton, and several other varieties $2 per 100, or $8 to $12 per 1000.

ORANGE, LEMON, CITRON, SHADDOCK, and LIME TREES, and all other GREEN-HOUSE TREES and PLANTS, can be supplied at reasonable rates.

Ornamental Department.

SELECT DECIDUOUS ORNAMENTAL TREES.

THE following comprise a *Select Assortment* of the most beautiful and estimable species, which our long experience has enabled us to arrange with precision. The inferior species we have omitted.

We have divided them into four classes. The first class comprises those of majestic growth, which attain great stature and ample development; the second class those which attain a medium size; the third class, those of low stature; and the fourth class, such as are comparatively of slow growth, requiring a long period before they attain the size of a small tree, and which, therefore, it would be more appropriate, in ornamenting grounds, to rank among large Shrubs.

The prices stated are for trees of fair size; but where extra large-sized trees are desired for Streets, Avenues, &c., in order to impart immediate ornament, such can be supplied at proportionate rates, varying in height from ten to twenty feet, of many of the most estimable species.

For Amygdalus, Carya, Castarea, Diospyros, Juglans, Mespilus, Morus, Prunus, Pyrus, &c., see Fruit and Nut Trees.

PÆONIES.

A special Descriptive Catalogue is published of our unrivalled collection of this magnificent class of Flowers, comprising about 125 varieties of Tree Pæonies, and 250 varieties of Herbaceous Pæonies.

SPLENDID BULBOUS FLOWERS.

Of this class of Flowers, so indispensable to every garden, in order to impart beauty in the early spring, our collection is very large. Not only do we import largely every year, but the assortment of Bulbs grown in our own gardens is very extensive. A separate special Catalogue of Bulbs (No. 9) will be sent to applicants. All choice varieties of the following species can be supplied at very low rates:—Hyacinths, Tulips, Japan and all other Lilies of 70 species and varieties, Crown Imperials, Fritillaries, Bulbocodium, Jonquils, Polyanthus Narcissus, Double and Single Narcissus, Crocus, Gladiolus, Snowdrop, Snowflake, Iris, Ornithogalum, Scilla, Allium, Ranunculus, Anemone, Cyclamen, Amaryllis, Ixia, Lachenalia, Zephyranthes, Oxalis, Gladiolus, Antholyza, Alstræmeria, Arum, Colchicum, Brunsvigia, Calochortus, Crinum, Dens Canis, Feraria, Hæmanthus, Pancratium, Tuberose, &c., &c. Select Roots of Hyacinths and other Bulbs, suitable for winter blooming in the house, can also be supplied.

POLYANTHUS, COWSLIP, PRIMROSE AND AURICULA.

We have made this lovely Family of Flowers a speciality, and have concentrated above 150 named varieties from England, France and Belgium, of which we will send a *Written Catalogue* of them to amateurs who may desire it.

HERBACEOUS FLOWERING PLANTS.

Of this class of plants our collection is very rich and extensive, and new acquisitions are frequent and numerous. Our present collection comprises not only all those usually found in other Catalogues, but many rare species and varieties which are not in any other American collection, all of which will be supplied at the lowest rates. The assortments of the following are very extensive :—Carnations, Picotees, Phlox, Iris, Chrysanthemum, Verbena, Hemerocallis, Double Hollyhock, Polyanthus, Primrose, Cowslip, Auricula, Daisies, Funkia, Lychnis, Pansies, Hibiscus, Ledum, &c.

SUMMER FLOWERING PLANTS, FOR BEDDING AND BORDERS.

A very extensive and select assortment of the most rare and beautiful species, many of which are entirely new.

GREENHOUSE PLANTS.

Assortments of the Camellia Japonica, Chinese Azalea, Fuchsia, Geranium, Achimenes, Nerium, Cineraria, Myrtle, Orange, Lemon, Citron, Acacia, Calceolaria, Passiflora, Gloxinia, Gladiolus, Amaryllis, Cactus, Erica, and of all other desirable genera, will be supplied at the lowest rates.

FRUIT AND ORNAMENTAL TREE SEEDS, ETC.

Apple, Pear, Peach, Cherry, Plum, Apricot, Quince, Grape and other Fruit Seeds, can be supplied in quantities. Also Seeds of Pines, Spruces and many other Evergreen Trees, and of many Deciduous Trees and Shrubs, and Flowering Plants. We have during the past year supplied the *United States Department of Agriculture* with a quantity of Tree Seeds, for the use of our Ministers and Consuls abroad. Orders for any of these should be given, if possible, in advance of the season for obtaining them.

AMERICAN SEEDS AND PLANTS FOR EUROPE.

Collections of Seeds of American Forest Trees and Shrubs, and of rare and beautiful American Plants, will be supplied, suitable to send to Europe and other countries.

at all times sell as low, and many articles lower than they can be obtained elsewhere, *of equal size and quality. The Extra-Large sized Trees*, which are in a bearing state, have required many years to bring them to their present size, and *are such as can seldom be obtained elsewhere*, and are worthy of the special attention of those who desire *Fruit Trees for immediate bearing*, whereby many years are gained in the planting of Orchards and Gardens. The Extra-Large sized Ornamental Trees and Shrubbery, including the Large sized Evergreen, are worthy the particular attention of those who desire to promptly embellish their Lawns, Avenues, and other Grounds, and many of them are especially adapted to Cemeteries. None of the Apples and Pears, or other Fruit Trees, are grafted on pieces of roots, as has been inconsiderately the practice elsewhere.

We do not here, as is customary and necessary in the western Nurseries of our State, cover three-fourths of our grounds with Apple Trees and other common Fruits; but in accordance with the general demands of our Correspondents, we embrace an assortment very enlarged and comprehensive. It will consequently be seen that of Ornamental Trees and Flowering Shrubs, Evergreens, Roses, Climbers, Bulbous Flowers, and Herbaceous Flowering Plants of every class, there is no comparison between the collections in the Flushing Nurseries and some distant ones, which have been unduly puffed *for their extent in acres.* Distant purchasers, and especially those located in the new and rising States of the North and West, should not allow themselves to be deceived by representations emanating from interested sources, but should make it an indispensable duty to visit and inspect the Long Island Nurseries to their perfect satisfaction.

Packing and Shipping.—All trees, &c., are labelled and packed in a superior manner, in matted bales or boxes, so that it is scarcely possible that any can be injured; and we charge for the packing barely the actual cost. We feel assured that we save to purchasers more than ten per cent. by our superior packing, by which even the smallest articles go safely. The cost of packing an ordinary bundle is 75 cents; those of extra size, or quite small, in proportion. We ship the packages, or send them by Railroad, Transportation Lines, or Express, precisely as ordered; but it is to be distinctly understood, that after being correctly labelled and shipped by us, *they are at the risk of the purchaser*, and the forwarders alone are to be held responsible therefor. Persons ordering are requested to give explicit directions as to the route by which they wish their goods forwarded; and if the place of their residence is not a Railroad or Express Station, to name the nearest Station to them, and mention some person at such Station to whom the goods can be consigned. Remittances may be made by Check or Draft; but if United States Notes are sent, they should be forwarded by Express, and the Agent's receipt therefor be sent to us.

Orders for Trees, &c.—Orders should be sent direct to us, and it is particularly requested that they be sent as early in the season as practicable, that the greater attention and care may be given to their execution. It is indispensable that every order be plainly and regularly made out, naming the edition of the Catalogue selected from, and also that plain directions, stating how the packages are to be marked and forwarded, should immediately follow the order, and *that these be entirely distinct from the letter.* It is also necessary to state in the orders for Fruit Trees, whether Standards or Dwarfs are wanted, and on what stock each kind is preferred. When any variation is allowed as to the precise kinds, by substituting others equally good or better, or when the selection of all or part of the varieties is left to us, we will exercise our judgment for the interest of the purchaser; and we cultivate none but the choicest varieties. If an error of any kind should occur, we desire to be promptly notified, that it may be rectified at once.

Specimen Trees.—Whenever specimen Trees are ordered by any Nurseryman or other person, they will be charged at the retail prices without discount, the extra time required to make such selections being important to us, and their accuracy of vital importance to the purchaser. In fact, many of the New and Rare Varieties are worth five times the price demanded, they having been obtained with great trouble and expense.

Terms.—For all amounts less than $50, *Cash* with the order, or to be collected by the Express on delivery.

For amounts over $50, *Cash*, or a suitable reference in New-York. Liberal arrangements will be made with Nurserymen and Venders, who are invited to call, or to address us by mail.

Visitors.—Visitors are at all times welcome to our grounds, in which something of interest is to be seen at almost any season. The village of Flushing is accessible ten or more times a day, by Steamboat and Railroad, from Fulton Market and James Slip, New-York, and by carriage from Hunter's Point, opposite 34th Street. One of the Nurseries adjoins the R. R. Dépôt, while another is next to the Steamboat Landing, and the third and largest is about a mile from the village, in a southerly direction.

ORDERS FOR EUROPE, CALIFORNIA, ETC.

We annually ship large numbers of Trees, Plants, Bulbs, Seeds, &c., to Europe, California, Oregon and other distant parts of the world, and have such experience in packing for long voyages that the articles arrive at their destination in the best of order.

Persons desiring articles sent to foreign countries, therefore, need have no hesitation in ordering, as our perfect system of packing insures success.

We subjoin a note received from the Director of the Prussian Garden at Potsdam, a short time since, to show the excellent condition in which our articles arrive abroad:—

"Potsdam, *le* 20 *Juin*, 1862.

"*Messieurs Prince et Cie*,—

"*Messieurs: J'ai l'honneur de vous annoncer, au nom de Monsieur Lenné, Général Directeur des Jardins du Roi de Prusse, que les vignes expédiées par vous, sont bien arrivées a Potsdam.*

"*M. Lenné fait vous dire les compliments les plus sincéres; il est bien enchanté de cette riche collection—de ces beaux exemplaires, et il me fait vous dire qu'il ne tardera pas de vous donner des commissions d'autres choses.*

"*Messieurs, j'ai l'honneur de me signer,*

"*Votre serviteur,* *REUTER.*"

TRANSLATION.

"Potsdam, *June* 20*th*, 1863.

"Messrs. Prince & Co,—

"Gentlemen: I have the honor to inform you, in the name of Mr. Lenné, General Director of the Gardens of the King of Prussia, that the vines forwarded by you have arrived in good order at Potsdam.

"Mr. Lenné presents to you his most sincere compliments; he is enchanted with this rich collection, with these splendid specimens, and he desires me to say that he will not delay in sending you orders for other articles.

"I have the honor, gentlemen, of subscribing myself,

"Your obedient servant, REUTER."
